Who we are

Studying in Rome will add an amazing cultural perspective to the quality of your studies. You will live in a city where you can perceive the passing of time by merely strolling across its central streets: ancient, Middle-Age, Renaissance, Baroque, Neoclassical and Modern Rome are ready to be discovered.

It is a centre for inter-religious debate and a place where the founding Treaty for the European Union was signed. In Rome you will be able to enjoy all this, surrounded by a gentle climate, arts and music, fashion and food.

The Campus of Tor Vergata University is about 40 minutes tube ride from the historical city centre of the “Eternal City” Rome and 20 minutes far from the peaceful Castelli Romani area, notorious for its vineyards and hillside landscape.

Tor Vergata's six Schools (Economics, Engineering, Humanities and Philosophy, Law, Medicine and Surgery, and Mathematics, Physics and Natural Sciences) are located in a vast 600-hectare campus. Each School is provided with its own library, teaching and research facilities, reading rooms, laboratories, canteens and green areas where students can experience a real campus life.

The **School of Medicine and Surgery** is part of the important University Hospital compound, the Policlinico Tor Vergata (PTV), where students can benefit from health care and physical emergency assistance.

Rome embraces Tor Vergata: let Tor Vergata embrace you!

12 Reasons to Choose Tor Vergata

1. We are located in Rome, in a calm and green area

2. We are a Public University with low tuition fees and excellent education

3. We have scholarships supporting your studies you can apply for once admitted

4. You can join our exchange programmes, Erasmus+ and Dual Degrees with prestigious international partner Universities

5. You will learn Italian and other languages for free alongside your studies

6. We provide a high level of interaction between students and professors, allow for free speech, enhance your skills and supervise your thesis work.

7. Our Placement Office will connect you with the best job offers

8. We offer the safe and well-organised Campus X for your accommodation

9. Study and life are balanced during your studies

10. We offer support with Stay Permit procedures and Welcome Weeks

11. We protect your privacy and your data

12. We always welcome diversity

General Ranking

Tor Vergata University of Rome is ranked **51st** in the "THE Young University Rankings" and is confirmed for 2022 among the best 100 young universities in the world, **at the third place** among Italian Universities in the ranking.

Source: "Times Higher Education" (THE)

Italian University System

The Italian university system is organised in three cycles, according to the Bologna Process that ensures standards comparability in the quality of higher education qualifications among European Institutions.

A brief overview:

- Bachelor of Science or of Art (Bachelor's degree)
B.A./B.Sc. - duration 3 years - 180 ECTS
- Master of Arts or Master of Science
M.A./M.Sc. - duration 2 years - 120 ECTS

- One-cycle degree - Undergraduate
M.A./M.Sc. - duration 5/6 years - 300/360 ECTS
- PhD - Doctoral degree - duration 3 years mainly

The system also offers other post-graduate courses

(typically 1 year, 60 ECTS):

- First Level Specialising Master (access with B.A./B.Sc.)
- Second Level Specialising Master
(access with M.A./M.Sc. or Undergraduate M.A./M.Sc.)
- Post-Graduate Training Course (so-called “Corsi di Perfezionamento”, for access, please inquire the course staff)
- Specialisation School (access with M.A./M.Sc.
or Undergraduate M.A./M.Sc.)

Our Students

Watch the videos about our students opinions and stories.

Tor Vergata University ranks 3rd among the major public Universities in Italy in terms of international student numbers (from 20,000 students up to 40,000).

Office, last 9 academic years.

Study in Italian

NON-EU NATIONALS (NOT RESIDENT IN ITALY – VISA APPLICANTS)

Once you have been admitted to your chosen course of study at Tor Vergata University of Rome, you must apply for pre-enrolment through the **UNIVERSITALY** portal (www.universitaly.it) from March to July and then contact the diplomatic-consular Representation in your country to provide the documents required for the visa to be

issued. All the information can be found on the Ministry's website at the following link:
<https://www.studiare-in-italia.it/studentistranieri/>

If you wish to enrol in a degree programme taught in Italian, you must either hold an **Italian Language Proficiency Certificate** of at least **B2 Level** of the Council of Europe, awarded according to the CLIQ (Italian Quality Language Certification) or pass the Italian language proficiency test organised by our University.

EU / NON-EU NATIONALS WITH A REGULAR ITALIAN STAY PERMIT

You are exempt from taking the Italian language test and presenting the certificate of Italian language proficiency at B2 level.

Please note: to take the compulsory national admission tests for Medicine and Surgery, Dentistry and Architecture and Construction Engineering, you must follow the online procedure on the University portal - www.universitaly.it, which you will find in the admission notice. For all other courses, you can consult the admission procedures in the calls at the link: http://web.uniroma2.it/it/percorso/offerta_formativa

852 €

Average tuition
fee amount paid
by students with
income abroad.

NON-EU STUDENTS

Non-EU students whose families earn their income abroad can choose:

to declare their income and pay the fees based on it, the amount of which may vary from a minimum of 156,00 € to a maximum taxation equal to 2500,00€, depending on both the country of origin and the degree course selected.

Please note that regardless of the degree course, if you come from the so-called “developing countries”, as defined in Decree no. 62 of 6th May 2020 issued by MUR*, the maximum annual fee is 500€.

**Afghanistan, Angola, Bangladesh, Benin, Bhutan, BurkinaFaso, Burundi, Cambodia, Central African Republic, Chad, Comoros, Congo Democratic Republic, Djibouti, Eritrea, Ethiopia, Gambia, Guinea, Guinea Bissau, Haiti, Kiribati, Korea Dem. Rep., Lao People's Democratic Republic, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mozambique, Myanmar, Nepal, Niger, Rwanda, Sao Tome & Principe, Senegal, Sierra Leone, Solomon Islands, Somalia, South Sudan, Sudan, Tanzania, Timor-Leste, Togo, Tuvalu, Uganda, Vanuatu, Yemen, Zambia and Zimbabwe.*

These students do not have to declare their family income and pay a flat-tax based on their Country of origin.

Note also that the winners of the LazioDisco scholarship, who are only exempt from the payment of the Regional Fee (140 Euros), are required to pay the yearly flat-tax contribution.

EU STUDENTS

EU students whose family income is earned either abroad or in Italy can choose to declare their income and pay the fees based on it, or not declare their family income and pay the yearly contribution, the amount of which may vary from a minimum of 156€ to a maximum equal to 7250,00€, according to a system based on the course of attendance.

For further information about the tax system and the required documentation for the reduction of tuition fees based on family income, for both EU and non-EU students, scan the following code.

Scholarship and Financial Aid

If you are willing to study at Tor Vergata University of Rome or in Italy and are looking for scholarships and study grants, here you will find a selection of grants and scholarships for Italian and international students offering the chance to study in Italy or work abroad.

Tor Vergata University of Rome provides its students with over 22 annual scholarships, grants and awards for financial support. Details are available on the website. <http://en.uniroma2.it/admissions/scholarships>

B.Sc. in Business Administration and Economics

This undergraduate programme is aimed at equipping students with conceptual and methodological tools necessary to cope with the complexity of our worldwide economy. The course presents a multi-disciplinary approach, tackling concepts and models from Management, Economics, Finance and Quantitative Methods.

The structure of the programme is continuously updated, focusing on the development of concrete links between theory and real-world applications. The international context supports our students to strengthen their own integration and co-competition abilities to successfully approach the professional and the personal life.

The BA&E programme provides the competencies and the conceptual and methodological tools to meet the challenges of the economic system and the internal dynamics of organisations and institutions that elaborate their strategies in it.

After two years of foundational courses, students will be able to select their area of expertise choosing between Business Administration and Economics, to be pursued during the third year.

B.A. in Global Governance

The Political Sciences B.A. Degree in Global Governance is open to students from all over the world with multidisciplinary interest and satisfies these prerequisites by involving professors from different disciplinary fields (such as Economics, Political Sciences, Engineering, Law, Humanities and Philosophy, Medicine, Mathematics, Management and Natural Sciences). This qualified faculty adequately prepares students and generates professionals able to face the current global phenomena. Today's leaders require legal and economic competences, a wide range of technical knowledge and historical sensibility as well as specific skills to manage cultural interaction. The course selects on average 100 students, half of them Italian. Students must have already obtained a high school diploma. Students are selected on the basis of their CV, their personal motivation and their openness to international experiences.

Student's placement so far has been in the best Master programmes all over the world (see www.globalgovernance.it for more information).

M.Sc. in Business Administration

The Master of Science in Business Administration is an internationally open, practice-oriented and job-market driven programme. It provides a solid management background and allows students to choose from six areas of specialisation, divided into fields of expertise and one multidisciplinary curriculum, strongly qualifying students for the career they are targeting:

- Management Consulting
- Marketing and Sales
- Human Resources
- Supply Chain
- Control and Auditing
- Curriculum in Management

Several courses are jointly developed together with Companies and Associations, hosting entrepreneurs and managers from leading Management Consulting Firms and International Companies.

The strong focus on the international market provides the necessary tools to understand and face the global dynamic competitive markets. In the context of a dynamic learning environment, our programme helps students in building a strong and internationally-open career path.

M.Sc. in Economics

The Master of Science in Economics (LM-56) is a two-year full-time programme offering advanced classes covering a broad spectrum of theoretical (e.g., Microeconomics, Macroeconomics), methodological (e.g., Mathematics, Statistics, Econometrics, Big Data Analysis & Machine Learning) and applied (e.g., Law and Economics, Labor Economics, Public Economics) topics. The academic program is designed for students who wish to acquire advanced theoretical and quantitative tools to pursue a career in the private sector or at national and international institutions, and as well as for those who wish to follow seek an academic career.

In addition to the advanced academic curriculum, useful and practical professional training activities are offered, such as courses on coding for economic applications (Phyton, Matlab, Stata, R) and Latex. Seminars are organised for job and PhD orientation as well as Alumni Meetings that enable students to develop their professional network. First-year students may apply to the Dual Degree Program at the University of Gothenburg or at the University of Konstanz.

M.Sc. in European Economy and Business Law

The Master of Science in **European Economy and Business Law** (LM-90, European Studies) is a two-year programme combining with political science, management, law and statistics. The programme encourages students to develop their skills and knowledge in a stimulating environment that offers **multidisciplinary approach**, academic rigour and international exchange. The programme also provides a number of **extra activities** to develop soft skills, and **internship opportunities**. The degree prepares graduates to work in international and non-governmental organisations, private companies and public administrations. Our student profile is a highly-skilled candidate, with excellent knowledge of English, an inclination towards international mobility and a strong interest in fieldwork learning activities. Eligible students may also take advantage of a **dual-title agreement with SOAS University of London** for an MSc in Economics.

M.Sc. in Finance and Banking

The Master of Science (LM-16) in Finance and Banking is a programme of quantitative methods for finance, designed for talented students who wish to acquire mathematical and statistical techniques applied to financial markets.

To integrate theory and practice students make an advanced use of MatLab, compare investment funds with Morningstar's extensive database and we analyse news and market data with Refinitiv Datastream and Eikon.

The Programme's industrial partners, such as ARPM, MathWorks, Morningstar, Refinitiv and Reply, are closely involved with the academic curriculum through the organisation of seminars, guest lectures and training activities. These partnerships give students a competitive edge and provide them with specific skills, dynamic interactions and advanced professional experiences.

Additional opportunities include Dual Degree agreements with prestigious universities as well as the annual QFin@Work workshop on quantitative methods in finance, insurance and banking.

PhD Contracts, Services and Markets Theory

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** Italian and English
- **Medium of Instruction:** Italian

The aim of the PhD Programme is to train students to conduct high-profile research in the field of contracts, services and markets. The Programme is a third level university course and lasts three years. The PhD Programme is organized within the Management and Law Department of Tor Vergata University in Rome as part of the University's Doctoral School. It is characterised by its international orientation. Agreements with foreign Universities are being taken to encourage collaborative PhD thesis. The PhD Teachers' Panel includes international renowned researchers from Paris/France, Brasil, Oxford/UK, Neuchatel/Swiss, Castilla La Mancha/Spain, Regensburg/Germany. The PhD programme is also characterised by its interdisciplinary approach. The variety of legal approaches allows students to gain a wide and high-level knowledge, preparing them for placement in private companies, public institutions and academia.

Coordinator: Prof. Martina Conticelli - martina.conticelli@uniroma2.it

PhD Economics and Finance

- **Duration:** 4 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** English

The PhD in Economics and Finance is a 4-year full-time programme providing advanced specialisation in economics, finance and quantitative methods to students whose goal is to pursue a successful career in academia or in institutions that require first-rate research skills. It offers a distinguished faculty, which promotes excellence in teaching and research, and a lively and international research environment. The Department has been recently financed by the Italian Ministry of Education, University and Research under the programme "Departments of Excellence". In the first year of the programme students take advanced of core courses in microeconomics, macroeconomics, finance and econometrics. After choosing their field of specialisation, the subsequent three years are entirely dedicated to research, including attendance and presentation at departmental seminars.

Coordinator: Prof. Tommaso Proietti - tommaso.proietti@uniroma2.it

PhD Management

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** Italian and English
- **Medium of Instruction:** English (mainly)

The PhD in Management is a 3-year programme that prepares to conduct high-profile research in the field of management, at universities, firms and research centres. It includes three tracks:

- Banking & Finance,
- Business Management & Accounting, and
- Public Management & Governance.

Each track has its own coordinator and focuses on specific research activities, lectures and seminars according to the peculiar research interests covered. The tracks jointly organise an intertwined first-year Research Methodology course aimed at developing an appropriate knowledge base for doctoral students. The scientific progress of the students is monitored through submission of activity reports, lecture attendance, and evaluation of yearly assignments. Presentations at national and international conferences and publications are strongly encouraged. The PhD faculty publishes in top-tier journals and has close scientific relationships with renowned universities worldwide.

Coordinator:

Prof. Fabio Monteduro - phd.ec.onomiaaziendale@uniroma2.it

Website: <http://economia.uniroma2.it/phd/management>

B.Sc. in Engineering Sciences

The B.Sc. in Engineering Sciences provides students with a solid background in the core disciplines (Mathematics, Physics and Chemistry) as well as specific preparation in Mechanics/Energetics, Mechatronics, Electronics and ICT/Internet Engineering. The interdisciplinary nature of the course enables students to develop a wide range of transferable skills: our students are able to solve engineering problems through laboratory experiments, numerical simulations and analysis of results. Graduates in Engineering Sciences are highly valued by multinational corporations, large international companies, private and public industries that seek young professionals with excellent operational skills, fluent use of English and the ability to engage critically with a range of different materials. Most of our graduates also go on to further study in Master's of Sciences either in Italy or abroad.

Academic Programme

Mandatory Courses

COURSE	ECTS	YEAR
Engineering Economics	6	1
Fundamentals of Chemistry	9	1
Fundamentals of Computing	9	1
Linear Algebra and Geometry	9	1
Mathematical Analysis I	12	1
Physics I	12	1
International English for Scientific Studies	3	1
Analogue Electronics	9	2
Electrical Network Analysis	9	2
Feedback Control Systems	9	2
Mathematical Analysis II	9	2
Mechanics of Materials and Structures	9	2
Physics II	9	2
Thermodynamics and Heat Transfer	9	2
Digital Electronics	9	3
Fundamentals of Mechanism of Systems	9	3
Final Exam (Thesis)	6	3
Formative Activities (Internship)	3	1, 2 or 3

Optional Courses

students must choose 1 group only among the 4 ones listed below:

Block A: Mechanical and Energy Engineering

COURSE	ECTS	YEAR
Energy Systems	6	3
Fluid Machinery	6	3
Machine Design	9	3
Manufacturing Technologies	9	3

Block B: Electronic Engineering

COURSE	ECTS	YEAR
Experimental Electronics	6	3
Experimental Electronics	6	3
Laboratory of Sensors	9	3
VLSI Circuit and System Design	9	3

Block C: ICT and Internet Engineering

COURSE	ECTS	YEAR
Digital Signal Processing	9	3
Electromagnetic Fields	6	3
Fundamentals of Telecommunications	6	3
Networking and Internet	9	3

Block D: Mechatronics Engineering

Fluid Machinery	6	3
Machine Design	9	3
Laboratory of Sensors	9	3

M.Sc. in Mechatronics Engineering

Tor Vergata University of Rome offers a M.Sc. in Mechatronics Engineering that combines electronics, mechanics, control theory and robotics. This Degree course merges fundamental elements of science, technology, and business to prepare second level graduates for a wide range of jobs in the mechatronics industry. It offers core graduate courses taught by research faculty members, alongside with elective courses taught by prominent experts in their fields, in all areas of Mechatronics. The training activity includes lab activities that give students the possibility of gaining valuable hands-on experience and opportunities to build personal and professional networks. Students will also develop specific experience in industrial labs. The choice of the study plan is based on the Bachelor's degree.

Academic Programme

1st YEAR

1st Semester

	Cfu	Ssd	class hours
8039927 – Integrated Sensors (Block A-C)	9	Ing-Inf/01	90
8039785 – Robot Mechanics (Blocks B-C)	9	Ing-Ind/13	90
8039781 – Power Electronics and Electrical Drives	9	Ing-Inf/01	90

2nd Semester

8039791 – Nanotechnology	6	Ing-Inf/01	60
8039166 – Vlsi Circuit and System Design	9	Ing-Inf/01	90
0000000 – Powertrain Technologies For Future Mobility (Block C)	9	Ing-Ind/08	90

2nd YEAR

1st Semester

	Cfu	Ssd	class hours
8039795 – Electronics of Iot and Embedded Systems			
M-5519 – Electronics of Iot	6	Ing-Inf/01	60
M-5520 – Design Of Embedded Systems for Mechatronics	6	Ing-Inf/01	60
8039927 – Integrated Sensors (Blocks B)	9	Ing-Inf/01	90
8039785 – Robot Mechanics (Block A)	9	Ing-Ind/13	90
8039823 – Control Of Mechanical Systems	9	Ing-Inf/04	90

2nd Semester

8039787 – Measurement Systems for Mechatronics	6	Ing-Inf/07	60
0000000 – Powertrain Technologies for Future Mobility (Blocks A-B)	9	Ing-Ind/08	90

Block A, Block B, or Block C

M.Sc. in ICT and Internet Engineering

The M.Sc. in ICT and Internet Engineering provides the skills needed to support and drive the Digital Transformation of our society. Our engineers will be able both to design the basic technologies (sensing, communication and networking) and to manage the Internet-based infrastructures and services emerging in many application domains (energy, transport, society, health, etc). Our Degrees offer learning paths in the Internet of Things, Cybersecurity, Communication Technologies, Space and Satellite Systems, covering the thematic areas Sensing & Communications, Networks & Security, Data Analytics & Methodologies.

M.Sc. in Chemical Nano-Engineering

The Erasmus Mundus Master (Laurea Magistrale) in Chemical Nano-Engineering (CNE) is a Joint Master programme offered by three European universities: Tor Vergata University of Rome (Italy), Aix-Marseille University (France), Wrocław University of Science and Technology (Poland).

This Master Course offers an original programme in the highly innovative domain. Skills will be acquired at the strongly interdisciplinary level needed to master emerging Nano-technologies and to develop original concepts and applications aiming at novel engineering breakthroughs in many domains; biomedical nanotechnologies, nanomaterials or applications for environment.

The originality of the programme is that it deepens the principles of chemistry and engineering with a special orientation in the field of nanotechnology and a strong address to the industrial reality. Another distinctive feature of this programme is the extensively developed courses dealing with the numerical design and engineering applications of Nano-systems. CNE programme is aimed at methodologies applied to Nanoengineering, application-oriented and specifically focused on chemical synthesis and characterisation. It targets the methodology of bottom-up designing of Nano-systems using modelling and chemical synthesis at Nanoscale.

Master's Objectives

- Provide an interdisciplinary training in the field of nano-engineering, which includes a deep understanding of the chemistry and the methods of synthesis and characterisation of nano-materials and nano-systems
- Give students expertise in numerical modeling to predict the chemical and physical properties at the nano-scale
- Train students to synthesise, characterise and model objects of the nano-world, in order to understand their properties, using disciplinary knowledge of fundamental sciences and transdisciplinary knowledge of nano-sciences
- Develop a creative, experimental approach to prepare, characterise and model nano-objects (nanostructures, nanomaterials or nano-devices) with unknown properties, or resolve problems related to their identification/application/production
- Prepare students for a career in the field of nanotechnology, by offering them a solid experience in this multidisciplinary domain of sciences and engineering

1

2

Year 1

Nano-Electrochem Emistry
Solid State Chemistry And Nano-Materials
Organic Chemistry of Nano-Materials
Basic Quantum Chemistry Modeling
Computational Modeling of Nano-Systems
Thermodynamics of Materials, Interactions
and Surface Forces
Nano-Engineering Seminar+ Project 1
English Language Laboratory 1
Structure and Crystallography of Solids
Synthesis and Fabrication of
Nano-Engineering Systems
Fabrication of Smart Polymers
Engineering of Nano-Machines
Bio-Photonics
Biomaterials - Biomedical Devices
Nanostructures in Industrial and Numerical
Applications
Economics And Management
Optional Courses

Year 2

3	Characterization of Nano-Engineering Systems	
7	- Fundamentals of Characterization	
3	of Nano Systems	2
3	- Characterization of Nano-Engineering	
7	Systems	4
	Nanoscale Synthesis Methods	5

- Prepare students to construct and realise individually or in team all the steps of a research and development project in the domain of nano-sciences and nanotechnologies, mobilising various pluridisciplinary parties
- Enable students to conceive, prepare and use nano-objects in various professional contexts, integrating ethical environmental and societal challenges
- Train highly qualified and creative graduates for the labour market with a big capacity to adapt themselves and to find new solutions for technological development (problem solving)
- Educate a new generation of engineers who can participate in the creation of new high-technology companies.

PhD Civil Engineering

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** English or French
- **Medium of Instruction:** Italian and English

The PhD programme in Civil Engineering includes all the research lines in Civil engineering and Architecture.

The disciplinary aim ranges from the scientific sectors of structural, geotechnical and environmental engineering to the history of construction, architectural composition and history of architecture in the important European tradition of the polytechnic school. The doctorate proposes three lines of research:

- i) Structural and Geotechnical Engineering (scientific contact: Prof. Paolo Bisegna);
- ii) Architecture and Construction (scientific contact: Prof. Tullia Iori);
- iii) Environmental engineering (scientific contact: Prof. Renato Gavasci).

The lines are closely linked to each other even in methodological autonomy. Despite the specificity of the individual research of the candidates, the doctoral programme is based on a solid base of training during the 3 years.

Coordinator: Prof. Tullia Iori - iori@uniroma2.it

PhD Computer Science, Control and Geoinformation

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** Italian

The PhD Programme offers advanced graduate education and cutting-edge research in the areas of computer science and engineering, systems, control, operations research and geoinformation. A wide variety of topics, both theoretical and applied, is developed throughout the programme of advanced studies. The main areas covered by the programme include control system science, system theory, robotics, algorithms, computer architectures, software engineering, distributed and mobile systems, operating systems, theoretical computer science, computer security, performance and reliability modeling, parallel and high-performance computing, operations research, optimisation, machine learning, remote sensing, imaging, geospatial analysis, geomatics, IoT, electromagnetics and earth sciences, environmental monitoring, human security and health, analysis of human settlements. The broad and diversified academic offer enables Ph.D. candidates to acquire in the framework of their doctoral thesis solid scientific and methodological knowledge for tackling complex problems, which are typical in today's rapidly evolving technologies.

Coordinator: Prof. Francesco Quaglia - francesco.quaglia@uniroma2.it

PhD Electronics Engineering

- **Duration:** 3 years
- **Admission conditions:**
Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:**
English
- **Medium of Instruction:**
English

The Doctoral Programme in Electronics Engineering concerns all the state of art aspects of modern Electronics. It is developed in 4 sections which are strictly interlinked through joint research activities: (i) Electronic Technologies and Systems; (ii) Telecommunications and Internet; (iii) Sensory and learning systems; (iv) Systems and technologies for space. PhD in Electronic Engineering aims to develop a teaching and research programme that reflects the highest standards in the field by exploiting the following features:

- High-quality PhD Board staff
- The teaching has a well-defined structure and is divided into core courses, thematic courses, and seminars
- Availability of large structures of the Department of Electronics Engineering (laboratory and computing facilities as well as access to library resources)
- Financial sustainability of the doctorate programme
- Well-defined administrative structure within the Department of Electronics Engineering
- International Advisory Committee

Coordinator: Prof. Corrado Di Natale - dinatale@uniroma2.it

Website: <http://phdelectronics.uniroma2.it/>

PhD Design, Manufacturing and Operations Engineering

- **Duration:** 3 years
- **Admission conditions:**
for Independent Candidates ONLY
Qualifications evaluation, Research Proposal and Oral Exam
for all other candidates, both from Italy and everywhere in the world
Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:**
Italian and English
- **Medium of Instruction:**
Italian and English

The PhD programme is mainly intended for applicants having a Master's degree in Mechanical Engineering or another equivalent degree. The focus is on in-depth knowledge of mechanical systems modeling, design theory and methodological issues concerning industrial technologies. The achievement of optimal solutions will be based on interdisciplinary knowledge approach, consistent scientific method, synergy of modelling capabilities, experimental competence as well as data analysis. These skills are always required in innovation developments, in original process technologies and in tuning of manufacturing activities. At the end of the three-year programme PhD students will gain advanced experience to competently tackle a large variety of tasks concerning technological innovations in the mechanical field. In every research activity, the analysis includes all aspects involved in the life of product; from design and reliability to life-end and possible reuse.

Coordinator: Prof. Ettore Pennestri - pennestri@mec.uniroma2.it

Website: <http://ipri-phd.uniroma2.it/>

PhD Enterprise Engineering

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** English and Italian

The PhD Programme, organized within the Department of Enterprise Engineering, provides the necessary skills to carry out highly qualified research activities at both public and private institutions, as well as qualifying skills in professional life, contributing to the creation of the European Area of Higher Education and the European Research Area. It is characterised by its multidisciplinary, international and inter-sectoral orientations, and aims to develop both in depth and frontier knowledge on topics in the field of management engineering (digital information law, knowledge management, operation & supply chain management, operation research, research evaluation, service management, simulation, sustainability, transport systems). The Programme is articulated around four cornerstones: 1) Training (ad hoc seminars, courses, summer schools, and the opportunity to spend a period of study abroad), 2) Research, 3) Impact (students are encouraged and financially supported to disseminate their scientific results at international workshops and to publish in high ranked journals), 4) Teaching (students are invited to offer lectures and to discuss their researches). The PhD Faculty belong to different disciplinary sectors and to several editorial boards of international scientific journals.

[From via dei Fori Imperiali | city centre]

PhD Industrial Engineering

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** English

The problems of modern industry are increasingly complex and require an intersectoral and interdisciplinary approach. In several cases the experimental techniques and the methods of calculus, modelling and simulation, typical of engineering must be supported by the specific knowledge of other disciplines, therefore experts of chemistry, applied physics, medicine are present in the scientific panel. In our PhD different competences meet to produce new projects and to realize machines, products and services of practical use. The spirit of the PhD programme is to train young researchers to become "problem solvers". The main cultural and scientific themes of the PhD programme in Industrial Engineering are: (i) Materials and Productive Processes; (ii) Energy and Environment; (iii) Micro-technologies and Devices for Biomedical and Nuclear applications; (iv) Mechatronics; (v) Design and Technology for Medicine and Sports; (vi) Chemical, Mechanical, Thermal and Optical Measurements; (vii) Technology and Methods for Cultural Heritage.

Coordinator: Prof. Marco Marinelli – marco.marinelli@uniroma2.it

Website: <http://phdindustrialengineering.uniroma2.it/>

Single-cycle Degree in Medicine and Surgery

Our aim is to provide students with the knowledge and tools to become successful graduates allowing them to possess a biomedical, psychological and social perspective of the medical profession. The course is characterised by a multidisciplinary and integrated approach in disease prevention and health promotion. We teach our students in a patient-oriented environment involving GP surgery and Hospitals integrating scientific principles learnt from lectures and applying them in real-life situations. We also strive to develop new models for clinical reasoning and engage students to develop logical thinking during clinical practice. Students will learn about the latest medical advancements allowing them to grasp a fundamental understanding appropriate for Medicine in the 21st century combining an in-depth exploration of medical knowledge characterising the Italian medical tradition with an international outlook suitable for the medical field of today. However, students should be aware that a basic knowledge of Italian will be required during clinical practice which starts from the third year.

We have in fact organised a free Basic Italian Course for all of our students.

Students profit from studying in small classes allowing for greater interaction with professors and better access to clinical practice. The percentage of international students is almost unmatched for a degree in Medicine and Surgery in Italy, as Tor Vergata and a few other universities successfully implement medical degrees in English that are unique for public universities in Europe outside anglophone countries.

M.Sc. in Physical Activity and Health Promotion

A Master's Degree course in Physical Activity and Health Promotion trains graduates who can work as skilled trainers in physical activities, trainers in amateur sports and wellness specialists. Graduates will be able to interact with other professionals such as Medical Doctors and biologists depending on their scientific and skillful competences. In particular, they will be able to cooperate with medical teams to cure and prevent pathologies such as chronic-degenerative diseases (e.g. metabolic syndrome, obesity, hypertension and ischemic heart diseases). Students have the possibility of attending a specific course of study depending on their previous degree either at Tor Vergata or at European and Non-European Universities, which are our partners.

PhD Biochemistry and Molecular Biology

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** English and Italian

The programme emphasis is training in research, and each student works closely with members of the staff. The training is performed also in the Department of Biology and in the Department of Chemical Sciences and Technologies, as well as foreign international research Institutions such as the Medical Research Council in UK. The BMB graduate research training is interdisciplinary, with a concentration in one or more of the following areas: Molecular Dynamics, Computational Biology, Drug Design, Structural Biology, Biochemistry and Enzymology, Cell Death Biochemistry, Clinical Biochemistry, Oncogenes and Onco-suppressors, Skin Differentiation and Skin, Regulation of Transcription, Cell Cycle Regulation, microRNA. The methods and experimental approaches used to address questions within these areas range from the techniques of molecular biology, protein chemistry, cell biology and biophysics to those of molecular and developmental genetics.

PhD Immunology, Molecular Medicine and Applied Biotechnology

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** English

The PhD Course is an innovative interfaculty initiative finalised to provide cutting edge scientific skills in translational medicine. The IMMAB Course aims at achieving the educational target of developing graduated scientists able to conjugate basic and applied science. **Main objectives:** (i) to develop a cultural and experimental bridge between basic and applied research; (ii) to provide new scientists with a broad grounding in the subject and to prepare them for their scientific and professional futures beyond the scope of the study plan for an individual project; (iii) to facilitate the career opportunities in the fields of medicine, health science, and biomedical research. **Educational goals:** (i) the achievement of scientific independence and leadership capacity; (ii) the achievement of cutting edge methodological skills in both laboratory and clinical research; (iii) the achievement of high quality knowledge in molecular biology and biomedicine.

The PhD course will include training periods in world-renowned centres.

PhD Medical-Surgical Applied Sciences

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** Italian and English

PhD Programme in Medical-Surgical Applied Sciences is divided in five research areas:

- Oncoplastic Breast Surgery;
- Plastic Regenerative Surgery;
- Clinical Nutrition;
- Innovative Technologies and Medical Engineering for Surgery;
- Forensic sciences.

The PhD programme is open to holders of second-cycle degrees (ie. Master's Degrees), or similar academic title, awarded overseas and recognized as equivalent to an Italian degree. The programme aims to prepare students for scientific research in field of Oncoplastic Breast Surgery, Plastic Regenerative Surgery, Clinical Nutrition, Innovative Technologies and Medical Engineering for Surgery Forensic Sciences.

Coordinator: Prof. Nicola Di Lorenzo - nicola.di.lorenzo@uniroma2.it

PhD Medical-Surgical Biotechnologies and Translational Medicine

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** Italian and English
- **Medium of Instruction:** Italian

The PhD programme includes three distinct areas, which have in common a marked focus on translational research applied to medicine:

(a) Biology of Reproduction and Development: it includes processes underlying male/female gametogenesis, mechanisms of stem cell differentiation and the early phases of embryogenesis. **(b) Biopathology and Innovative Therapies in Hematology:** it focuses on recent advances in biomarkers applied to diagnostics and prognosis in human pathology, genetics and hematology. **(c) Diagnostic Imaging:** it focuses on advanced imaging techniques for the study of morphology and functional aspects with special interest in the cerebral district. Research in this area aims to provide insights for modern applications of interventional radiology. This represents one of the most rapidly evolving fields in medicine, with important impact on treatment of several disease of intravascular and extravascular nature, either benign or malignant.

PhD Microbiology, Immunology, Infectious Diseases and Transplants

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** Italian and English
- **Medium of Instruction:** Italian and English

The PhD Course in Microbiology, Immunology, Infectious diseases, Transplantation and Related Diseases (MIMIT) provides an educational training aimed at the acquisition of basic microbiological and immunological knowledge and at the deepening of some specific topics, with particular attention to the molecular aspects of pathogenesis process involved in the infectious diseases and the host's immune response.

The PhD student is supported in the research activity by a tutor who has the main task of leading him/her to acquire autonomy in the creation of a manuscript (knowledge of the literature, drafting of protocols, experimentation, critical interpretation of results, and identification of a journal for publication). It is also desirable to introduce the doctoral student to the necessary steps for fund access or raising as well as to write a project, develop and make reports.

PhD Neuroscience

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** Italian and English
- **Medium of Instruction:** Italian and English

PhD Program in Neuroscience provides interesting and rigorous research training in a broad range of areas of neuroscience, including cognitive and behavioural neuroscience, molecular neuroscience and neurophysiology. Each PhD student will be assigned to a research group in which he/she will choose a research topic on the basis of his/her main scientific interests and personal background. Research activities will take place both in laboratories and clinics and, on completion of their training, the students will have acquired technical skills and learnt to carry out a research project. These objectives will be achieved through specific mentoring, which will teach students to autonomously drive scientific reasoning. They will also participate in lectures and interactive seminars to keep up to date with latest scientific developments. Finally, students will have the opportunity to perform part of their research activities in other Neuroscience Laboratories and Institutes, also abroad.

PhD Nursing Sciences and Public Health

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** Italian and English
- **Medium of Instruction:** Italian and English

This Doctoral Degree (PhD) has the objectives to prepare researchers who can contribute to the development of research methodologies in the field of nursing sciences and public health. During this PhD programme, students will acquire quantitative and qualitative research and then will be able to conduct observational and/or experimental studies within a multidisciplinary setting. This PhD consists of two different curricula, the first, for students with a Master's Degree in Nursing Sciences, and the second for students with a degree in Medicine who are interested in Public Health. Both curricula convey the same vision of a modern health system, which is devoted to patients and their families, which is widespread in community settings, and aware of the influence that prevention, organization, and costs have on healthcare assistance.

PhD Systems and Experimental Medicine

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** Italian and English
- **Medium of Instruction:** Italian and English

The PhD programme is focused into five research topics in the Internal Medicine area: (a) Metabolic disorders (Obesity, Diabetes, NAFLD, Atherosclerosis) (b) Cardiovascular disorders, (c) Mucosal Inflammation disorders (Inflammatory Bowel Disease), (d) Clinical Oncology, (e) Respiratory disorders. The course is organized in three years with compulsory laboratory attendance. At the beginning of the first academic year, students will be assigned a research project and a laboratory supervisor in accordance with the purpose of the course. Every year a cycle of seminars concerning the PhD programme topics will be organized by the Coordinator and the faculty. Seminars attendance is compulsory for PhD students. Doctoral students, following the supervisors' proposal, may be authorized by the coordinator, after consultation with the faculty, to attend training periods at Italian or foreign laboratories to carry out some of the activities related to the achievement of the doctorate project.

PhD Tissue Engineering and Remodeling Biotechnologies for Body Function

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** Italian and English
- **Medium of Instruction:** English

This Multidisciplinary Research Doctorate aims to extend the knowledge both at the molecular and clinical levels on acquired and/or hereditary diseases, concerning (i) the motility apparatus, (ii) the maxillo-facial district, (iii) the vision system, (iv) the otorhinolaryngology system. The Doctorate is subdivided in four pathways, closely interrelated, namely of (i) molecular pathophysiology, (ii) tissue engineering and remodeling, (iii) clinical research, (iv) therapeutic and rehabilitation application.

Thanks to the multidisciplinary of expertises, ranging between Biochemistry, Molecular Biology and Pathology, Cell Pathology, Tissue and Genetic Engineering, Biomechanics and Clinics, the Doctorate aims to accomplish:

- the optimisation of biotechnological resources in the molecular and cellular field;
- the design and experimentation of innovative systems, pathways and diagnostic protocols.

Single-cycle Degree in Pharmacy

Our **Degree Course in Pharmacy** was founded by our School of Medicine and School of Science in partnership with the prestigious School of Pharmacy of the University of Nottingham (UK) and Alliance Boots. This collaboration provides an opportunity for our best students to join internship projects at Nottingham university, emphasizing the internationalization and making this course highly competitive and innovative. We offer a solid theoretical foundation with an emphasis on practical applications in order to allow operating not only in the community or hospital pharmacy but also in the field of pharmaceutical research, in the pharmaceutical industry and in the healthcare sector. The classical didactic activity is also integrated with outstanding lectures and workshops held by qualified scientists with different backgrounds.

Another great innovation of the course is the introduction of teachings in the field of Regulatory Sciences which provides an overview of the regulatory affairs in the EU and its effect on medicinal product development.

M.Sc. in Biotechnology

Tor Vergata University of Rome provides an exciting M.Sc in Biotechnology program that combines biochemistry, molecular biology, genetics, pharmacology and microbiology with business fundamentals and ecology. This Degree course merges fundamental elements of science, technology and business to prepare second-level graduates for a wide range of jobs in the biotechnology industry. The course also includes a lab internship that gives students the possibility of gaining valuable hands-on experience and opportunities to build personal and professional networks.

Students may choose between two curricula:

Applied Biotechnology, which aims at developing a deep knowledge of the theory and fundamentals of biotechnology and the necessary skills to perform a variety of role roles in laboratories engaged in research or development of biotechnological products.

Clinical Research, which aims at training professional figures involved in organizational, managerial and control roles in the field of clinical trials.

M.Sc. in Physics Curriculum in Astrophysics and Space Science

Our Curriculum in Astrophysics and Space Science aims at providing students with an excellent background in astrophysics, to introduce them to the world of modern astrophysical research, and to promote their future career in this field.

Modern astrophysics is one of the most rapidly evolving scientific fields: the current period is often defined as “Golden Age of Astrophysics”. Recent discoveries have significantly improved our knowledge in many different areas: solar and stellar physics, extragalactic astrophysics, observational cosmology, physics of gravitation. The curriculum in Astrophysics and Space Science is designed to provide the students with a strong background and competences in all these sectors. The practical activities of this course are designed to train students in aspects connected with technological developments, data analysis and image processing and it is aimed at enhancing their capabilities in inter-sectorial areas (modeling, problem solving, high performance computing, big data handling).

The curriculum is in collaboration with several research institutions in the Tor Vergata area, such as the National Institute for Astrophysics (INAF), the National Institute for Nuclear Physics (INFN), the Italian Space Agency (ASI), and it also some offers classes taught by researchers from these institutions, who represent the forefront in their fields.

From Academic Year 2022-23 the M. Sc. in Physics offers the Erasmus+ Master Program MASS (www.master-mass.eu).

M.Sc. in Physics

Curriculum in Physics of Fundamental Interactions and Experimental Techniques

This course aims at providing advanced theoretical and experimental background in the fundamental mechanisms of interaction between particles or objects, to which all the known forces of nature – gravitational, electromagnetic, strong and weak – can be traced. These mechanisms are of the utmost importance in understanding the present state of the universe and how it has evolved. The course also connects the most advanced physics courses with the application of modern technology and providing experiences in the field of science and innovation.

The Curriculum is designed in collaboration with research institutions of INFN, CNR, ENEA, ASI, INAF in the Tor Vergata area. Students may be involved in research projects within the main experiments in the fields of particle physics, gravitational physics, astroparticle physics and dark matter search, nuclear and hadronic physics, accelerator physics, neutron radiation for medical therapy.

M.Sc. in Physics

Curriculum in Physics of Complex Systems and Big Data

Modern life is founded on discoveries in Physics and Physics-based sectors are a major contributor to the Italian economy according to a recent Deloitte report. The curriculum in Physics of Complex Systems and Big Data aims at providing students with the ability to deal with complex systems, identifying the most adequate computational platforms and software frameworks in order to elaborate solutions to specific problems.

In addition to the advanced physics courses on Quantum Mechanics, Material Science and Mathematical Methods for Physics, the course offers specific lectures on: Optimization and Statistical Mechanics, Complex and Neural Networks, Digital Data Analysis, Advanced Statistics Data Bases and Machine Learning. Many lectures include practical activities with laboratories in collaboration with research centers in the Tor Vergata area: Informatics, Electronics and Astrophysics.

PhD Astronomy, Astrophysics and Space Science

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** English
- **Activated on alternate years at Universities of Rome Tor Vergata and Sapienza**

The PhD course in Astronomy Astrophysics and Space Science is a joint research programme between Tor Vergata University of Rome, the Sapienza-University of Rome and the National Institute of Astrophysics (INAF). At the end of the programme PhD students will obtain a joint degree of the two Universities. The aim of the Astronomy, Astrophysics and Space Science Ph.D. Programme is the formation of young researchers at a highly competitive international level. In addition, the PhD aims to train managers in private/public organizations that deal with complex systems. The PhD Programme covers, in both their theoretical and observational aspects, almost all the topics of modern Astrophysics and Space Science in: (i) Galactic and Extragalactic Astrophysics; (ii) Gravitation and Cosmology; (iii) Solar, Planetary, and Stellar Physics; (iv) Space Sciences. PhD. Students will have the opportunity to access all the facilities from 5 different research institutes in the Area.

Coordinator: Prof. Nicola Vittorio - nicola.vittorio@roma2.infn.it

PhD Chemical Sciences

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** Italian and English
- **Medium of Instruction:** Italian

The PhD in Chemical Sciences is aimed to outstanding students, who will be the next-generation researchers in Chemistry and related fields. Our Doctor is a Scientist in fundamental or applied fields where Chemistry is key, from health to energy, to low impact processes.

This is accomplished by a programme of activities on: (i) Material Chemistry and Biomaterials; (ii) Synthesis and Reactivity; (iii) Chemical (bio)sensors; (iv) Chemistry of biomolecules and macromolecules; (v) Supramolecular chemistry, according to the expertise and the scientific activities of our groups.

During the PhD, the student attends courses and seminars provided by Professors and Researchers of our University or Visiting Professors and each year are asked to report on the achieved progresses to the Members of the Doctorate School.

Finally, our PhD School encourages the students to study and work abroad using the several programmes for student mobility and taking advantage of the many collaborations of the Department with other Universities and Research Centers.

Coordinator: Prof. Gaio Paradossi - paradossi@stc.uniroma2.it

PhD Evolutionary Biology and Ecology

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** English

The programme offers a unique multidisciplinary training experience leading to a Doctorate degree. The Biology Department, in partnership with private and public institutions in the Rome area, have formed a Programme that crosses traditional disciplinary boundaries to offer the student the appropriate interdisciplinary research training and to enrich the plurality of knowledge. The Scientific Board is made of experts of various scientific fields, and graduate students can select from research opportunities in areas as Anthropology, Applied Biology and Biochemistry, Botany, Ecology, Genetics, Microbiology, Parasitology, Physiology and Zoology. The main goal of the programme consists of enabling students to become independent, creative, and productive researchers, by cultivating their skills in a multidisciplinary environment. Specialized courses are programmed as well as ad hoc seminars in research management, research & funding systems, exploitation of research results and intellectual property.

PhD Materials For Health, Environment and Energy

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** English

Access to renewable and sustainable energy conversion and storage devices, environment protection and preservation together with the development of technologies allowing to enhance health care and life quality for the aging world population are the greatest challenges of the 21st century. This requires a multidisciplinary effort involving chemistry, physics, materials science, biology, and medicine. Materials are crucial for the development of all sustainable technologies and this PhD Course is addressed to the investigation of materials and related devices, it enables the PhD candidates to acquire solid scientific and methodological knowledge for tackling complex problems in the framework of their doctoral thesis. Our aim is to prepare experts in materials preparation, processing and application in the fields of energy and health that might then be occupied in academia as well as in professional or industrial enterprises. Candidates are expected to be pro-active researcher and team player, adaptable to a multicultural environment.

Coordinator: Prof. Elisabetta Di Bartolomeo - dibartolomeo@uniroma2.it
Website: <http://materials-phd.uniroma2.it>

PhD Mathematics

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** Italian or English
- **Medium of Instruction:** English

The school aims at preparing highly skilled mathematicians able to work both in Academia and in private or public institutions using advanced mathematical research. To this end several advanced courses are offered each year and a great number of seminars are organized regularly. The Department is a very lively stimulating scientific environment, involved in European Networks, hosting research centers and international schools. More activities are organized with other Rome Math Departments and institutions such as INdAM and IAC. PhD students are offered a variety of research options both in pure and applied Mathematics for their thesis subject. The high scientific quality of the research options at the Department is testified by research evaluations, ERC grants, and invitations to top international conferences. The Department has many agreements with foreign institutions or research consortia, where PhD students are encouraged to spend part of their training.

Coordinator: Prof. Carlangelo Liverani - liverani@mat.uniroma2.it

PhD Cellular and Molecular Biology

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** English

The PhD course in Cellular and Molecular Biology (BCM) aims to provide students with the tools necessary to contribute to the advancement of science in the fields of molecular Biology, Cell Biology, Cellular Biochemistry, Molecular Genetics, and Bioinformatics, through rigorous research and the publication of high-impact articles.

This PhD programme will allow the students to acquire scientific and technical skills, essential for the continuation of their scientific and research career. BCM PhD students will: (i) analyse a scientific problem, formulate hypotheses and choose the appropriate experimental approaches to provide answers and solutions; design the experiments, according to a time plan, to achieve interrelated results; learn to draw conclusions, on the basis of the results obtained, and assess their statistical significance; (ii) become intellectually independent (iii) achieve excellent communication skills in English; (iv) conduct responsible research and develop ability to work in a team.

Coordinator: Prof. Maria Rosa Ciriolo ciriolo@bio.uniroma2.it

PhD Physics

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** Italian and English

The Department of Physics of Tor Vergata University of Rome organizes and supports the PHD in physics with top level scientific scientists and international collaborations on the following scientific areas: (i) High energy physics, nuclear physics and theory of fundamental interactions; (ii) Physics of condensed matter (solid, liquid, soft, disordered systems,...); (iii) Computational physics and physics of complex systems; (iv) Astrophysics and space physics; (v) Materials science, nanoscience and applied physics; (vi) Atmospheric Physics and Climate. Research activities are performed using the Department facilities (laboratories, computational resources,...) and in collaboration with other national and international research centers (CERN, INFN, CNR). Within the programmes, students are encouraged and financially supported to participate and disseminate their scientific results at international workshops and to promote new scientific challenges.

Coordinator: Prof. Massimo Bianchi - massimo.bianchi@roma2.infn.it

M.A. in European History

Tor Vergata University of Rome offers a new, innovative approach to the history of Europe in a global perspective.

The **M.A. in European History**, is a stimulating interdisciplinary, comparative two-year international programme offered by a consortium of prestigious Universities based in European capitals.

Full members Universities:

France: Université Paris Diderot

Germany: Humboldt-Universität zu Berlin

Ireland: University College Dublin

Italy: Tor Vergata University of Rome
University of Rome Roma Tre

Norway: Universitetet i Oslo

Associated members:

Austria: Universität Wien

Bosnia: University of Sarajevo

Estonia: Tallinn University

Portugal: Universidade NOVA de Lisboa

Serbia: University of Belgrade

Spain: Universidad Complutense de Madrid

Graduates of the MEH will be awarded an M.A. title with a double degree issued by Tor Vergata University of Rome and by the host full member partner university/universities attended by the student.

Students enrolled in the M.A. in European History at Tor Vergata University, don't have to pay extra-fees at the partner Universities during the mobility programmes and they can also apply for specific Erasmus grants for the term spent abroad.

Every year the MEH organizes a **Summer school** for students of the programme in which they can meet other students and faculty members of all participating academic Institutions, to discuss fundamental topics and to better know each other.

Students will follow courses regarding the following subjects:

- Social and economic history
- Cultural history and the history of religions
- History of science and Gender history
- History of dictatorships and violence
- Colonialism and post-colonialism
- Imperial history and nation-building
- International and transcultural relationships and migration

The **MA in European History** is particularly suited for students interested in pursuing careers in international organisations and foundations. They may achieve skills that can be applied to a broad range of careers, e.g. in educational and cultural sectors, as well as in journalism, administration or diplomacy. The programme will be an excellent preparation for those wishing to complete a PhD in History.

Study Structure

The MA in European History is a two year Master's programme divided into four phases (two winter and two summer terms). The programme starts in the winter term and has a modular structure. It is made up of 120 Credit points (ECTS) – 30 ECTS each term.

All students are obliged to study at least at two of the participating universities in different countries, with the recognition of the exams taken at the partner universities. In order to obtain a double degree students must complete at least 30 ECTS at a full member partner university and the Master's thesis must be supervised by faculty members of the home and of the partner university. For a second period of mobility students can also choose an associated member university.

M.A. in Art History in Rome from Late Antiquity to the Present

The Master of Arts in Art History in Rome from Late Antiquity to the Present is a two-year programme taught entirely in English, thus internationally open and practice-oriented. Its hallmark rests in its intensive nature, concentrated on the exceptional quality of Rome monumental heritage.

During the first year the students will be provided with a solid background on Roman art and architecture from Constantine Age to the Present; during the second year they will be able to choose among a wide range of specialized courses, naturally orienting their academic careers towards a more specific field of study. The teaching will be mostly held in direct contact with the art works and contexts, thanks to frequent surveys and visits to museums, collections, buildings and monumental sites. The programme has close ties with many of the most important art history institutions active in Rome, both Italian and international, and offers a network of stages and internships helping students targeting their future professional development.

M.A. in Tourism Strategy, Cultural Heritage and Made in Italy

Tourism is a burgeoning industry all over the world, one of the primary and fastest-growing economic sectors and a key driver for socio-economic progress.

These are the reasons why Tor Vergata University of Rome and our Department have set up an interdisciplinary Master's Degree aimed at the training of international operators and experts in current strategies of tourism planning.

The Course responds to a wide demand for training and employment prospects in tourism, expressed by foreign and Italian students, who are already engaged in bachelor degrees in tourism and other sectors of our Universities as well as the other national and international ones.

Some institutions: (**Convention Bureau Italia; Learn Italy – The Italian School, NY; FederCongressi; UAE Embassy**), **universities (Pennsylvania State University-Erie – Fine Arts Department; Technological University Dublin – School of Hospitality Management & Tourism; University of Brighton-Centre of Sport, Tourism and Leisure; Solent University, School of Business, Law and Communication – Southampton UK; Uniwersytet Gdanski, Institute of Geography, Department of Spatial Management)** and national and international companies (**RSI Group/Tridente Collection; RCHS.EU; StepStone Group/ HOTELCARE-ER; European Interior Company – Bucarest**) have declared an interest to collaboration agreements and conventions for traineeship and internship offers, as well as work experiences for students and graduates.

Also, the training and professionalizing project of the Course was appreciated as an original proposal by some international projects (**Expo Dubai 2020 – “Forgotten connections. The Islamic heritage in Italy”; Programa Institucional De Internacionalização – Capes/Print (2018)** in cooperation with Brazilian universities; Professional Technical Center, promoted by Latium Region, Department of Education, Right to Education, University and Research, in the Economic and Professional Area (**“Tourism and the economy of the sea”**)).

PhD Classical Antiquity and Its Reception: Archaeology, Philology, History

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** Italian and a language skills test for two languages among English, French, German, Spanish, Polish, Russian and Portuguese
- **Medium of Instruction:** Italian

Since its establishment, Tor Vergata University of Rome has always provided high-level education in Classics. In the last twenty years, the PhD courses in Ancient History and in Classics have constantly reached the top scores in the national rankings both for the global quality of research of our faculties and students and for the job opportunities provided after the conclusion of the courses. The disciplines taught in the PhD course cover a wide range of topics related to Greek and Roman civilisation, from philology to history, from historiography to archaeology, from epigraphy to papyrology etc. Students are encouraged to undertake innovative research projects under the guidance of one or more teachers, and at the same time to develop a comprehensive understanding of the ancient world.

Students are constantly encouraged to face the world of scientific publications, either directly or through the teachers' mediation. In particular, they have the opportunity to understand from the inside the editorial life of national and international journals with which the Doctorate has collaborative relationships or that are themselves emanations of the Doctorate.

PhD Comparative Studies: Languages, Literature and Arts

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** Italian and English or French or German or Spanish or Russian or Polish or Portuguese
- **Medium of Instruction:** Italian

The aim of the scientific discipline known as "Comparative Studies" is to identify relationships between authors, texts, works of art, movements and phenomena of different cultures so as to highlight their characteristic aspects in terms of both continuity and specificity.

In the contemporary era of multiculturalism and globalisation, as the dissemination of ideas becomes increasingly more rapid and widespread, an openness to alterity acquires fundamental significance and impacts linguistic, literary and artistic experiences, thereby modifying consolidated models and creating new ones. On the basis of these considerations, and also with reference to recent interchanges within the European Union regarding cultural policies, the comparativist approach of the course, provided in Italian, permits an important and original expansion of the themes and perspectives of recent research in linguistics, literature and art history.

PhD Cultural Heritage, Education and Territory

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** English
- **Medium of Instruction:** Italian and English

The Ph.D. programme combines multiple research areas: geography, education, philosophy of education, comparative education, dynamic psychology, art history, archaeology, musicology, theatre and film history, and history. While respecting the specificity of each area, the doctorate is characterised by an interdisciplinary approach that underlies the formation of young scholars who have highly developed cultural and methodological competences, whether in an academic context or in operational one. In addition to the relationship between the different areas - represented by members of the Doctoral Committee - the interdisciplinary approach of this course also features the use of technology, with particular reference to geographical, archaeological and art-historical fields. An important aspect that characterises this doctorate programme is its international character, due - above all - to the close relationships and frequent contact which most Doctoral Committee members have with foreign universities.

PhD History and Philosophical-Social Sciences

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Oral Exam
- **Language/s required for the exam/s:** Italian and a skill test for English as a foreign language
- **Medium of Instruction:** Italian

The PhD programme in History and Philosophical and Social Sciences is organised into two curricula: 1) History 2) Philosophical and Social Sciences. The multidisciplinary and comparative approach represents the remarkable element of the Program. The Program promotes advanced training and research activities in a large number of disciplines: Medieval History, Modern History, Contemporary History, Economic and Business History, History of Christianity and Churches, Christian and Medieval Archaeology, Political Philosophy, Aesthetics, Sociology, History of Science et al.

Professors and researchers work together to develop ideas through seminars, debates and exploration of sources. Moreover, scholars in many fields are invited to offer lectures and to discuss their researches. The didactic plan includes sessions in which the PhD students expose their researches, thus learn to develop and discuss their work, and so to join scholarly networks.

Doctoral students are offered the possibility to carry out periods of study abroad and to experience joint supervision by scholars based in foreign universities, with which our Programme has co-tutorship agreements."

Coordinator: Prof. Daniela Felisini - felisini@uniroma2.it

Website: <http://dottoratostoriaeilosofiasociale.uniroma2.it/>

PhD Philosophy

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** At least 2 among English, French, Spanish and German at candidate's choice
- **Medium of Instruction:** Italian
- **Activated every three years alternately at Tor Vergata University of Rome and University of Roma Tre**

The joint doctoral programme in philosophy of Tor Vergata University of Rome and Roma Tre aims to meet different but complementary and equally important cultural needs: it intends to promote the specific heritage of philosophical studies, widely articulated and rooted in a tradition of high scientific value, and to enhance the interdisciplinary calling of philosophy, encouraging synergies with other forms of knowledge – i.e. theoretical, technical-scientific and ethical-practical. It provides yearly four main courses with frequent contributions by external experts. The educational offer is enriched by study days dedicated to different specific topics and to the discussion of the perspectives or outcomes of ongoing researches. The doctoral school keeps many collaborative relationships with Italian and foreign Universities and supports PhD dissertations under joint supervision.

A curriculum with the University of Paris 1 Panthéon Sorbonne confers a double degree. It is also starting an agreement with the Institute for Cognitive Science and Technology (CNR-ISTC).

PhD Law and Judicial Remedies: Private Law, Comparative Law, Roman Legal System

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** English or French or German or Spanish or Chinese or Arabic or Persian (at candidate's choice)
- **Medium of Instruction:** Italian

The PhD promotes an interdisciplinary methodology, taking into account History of law, Comparative law, Civil law (substantive and procedural). The PhD has two specific paths:

Judicial Remedies, Management and Company Law: The path aims at educating the student in managing complex legal issues with an interdisciplinary approach, from both a substantive and a procedural legal perspective, taking into account legal comparison and issues of internationalization. Attending students will be guided and directed, integrating theoretical knowledge with practical training in judicial institutions, professional organizations, business management and administration.

Roman Law, Civil Law and Comparative Law: The path aims at providing knowledge and understanding of the role: 1) of Roman Law in the contemporary legal systems (Europe, Latin America and Asia); 2) of Islamic Law in the contemporary legal systems.

Coordinator: Prof. Massimo Papa – massimo.papa@uniroma2.it

Website: <http://dirittoetutela.uniroma2.it>

PhD Public Law

- **Duration:** 3 years
- **Admission conditions:** Qualifications evaluation and Written Exam and Oral Exam
- **Language/s required for the exam/s:** English or French or German or Spanish (at candidate's choice)
- **Medium of Instruction:** Italian

The doctorate in Public Law is a unitary doctorate characterised by interdisciplinarity. The doctorate is divided into special areas of research:

Constitutional and Administrative law covering: Constitutional law, Administrative law, Institutional Public law, Canon law and Ecclesiastical law;

International, European and Maritime law covering: International law, European Union law, Maritimen law;

Penal law covering: Criminal law, Criminal Procedure;

Theory of the State covering: Legal Philosophy and Theory of the State, History of Medioeval law

The above-mentioned areas are considered as including also the following sub-areas of research: Public Comparative law, Regional law, Multilevel Constitutionalism, Constitutional Justice, Administrative Justice, Public Economic law, Criminal Economic law, Tax law, History of Public law, Private International law and International civil Procedure.

How to apply

1

Choose a course

<http://en.uniroma2.it/academics/courses/>

2

Meet the requirements

Before you start your online application, you should carefully check the admission requirements for each degree course.

Bachelor's Degree

To enrol for a degree course in Italy, you must have a secondary school diploma with at least 12 years of schooling and present the comparability certificate issued by CIMEA, which you can request online via the following link:

<https://cimea.diplo-me.eu/torvergata/#/auth/login>

Foundation course - new activation

Propaedeutic courses intended for foreign titles obtained with less than 12 years of schooling or for which students do not have the requirements prescribed by Italian law.

Master's Degree

To enrol for a Master's degree programme, you must have a final academic qualification (level VI - European Qualifications Framework - EQF) and present the comparability certificate issued by CIMEA, which you can request online via the following link:

<https://cimea.diplo-me.eu/torvergata/#/auth/login>

3

Admission

Application and admission deadlines are indicated in the Calls for each study course (from December to July)

NON-EU NATIONALS

(NOT RESIDENT IN ITALY – VISA APPLICANTS)

Once you have been admitted to your chosen course of study at Tor Vergata University of Rome, you must apply for pre-enrolment through the UNIVERSITALY portal (www.university.it) from March to July and then contact the diplomatic-consular Representation in your country to provide the documents required for the visa to be issued. All the information can be found on the Ministry's website at the following link:
<https://www.studiare-in-italia.it/studentistranieri/>

EU / NON-EU NATIONALS

WITH A REGULAR ITALIAN STAY PERMIT

Once you have been admitted, you can enrol for your chosen course by following the procedures indicated on the Delphi portal.
To enrol for the Medicine and Surgery, Dentistry and Architecture and Construction Engineering courses, you must pass the National Level Test (IMAT) as indicated in the relevant announcements.

4

Enrolment

After admission, you will be able to enrol from March to November. Please contact our offices only if you need help uploading your documents and paying fees

How to apply for PhD courses

■ Participation in the PhD Programmes is subject to selection in a public Call for applications. The application process is exclusively online. The selection process is usually based on qualifications and exams. Details on application requirements, available positions and scholarships are duly provided at dottorati.uniroma2.it and in the Call for applications.

Restrictions on scholarships apply only if the applicant has already received a PhD scholarship from any Italian University. Applicants may also apply as Independent Candidates, also called Borsisti di Stato Estero, if they have their own source of funding, such as:

- A bank account balance of at least 5,800 euros
- A scholarship funded by the government of the country of origin
- A scholarship funded by the Italian Ministry of Foreign Affairs and International Cooperation (MAECI)
- The written declaration of any Institution, both in Italy and abroad
- An employment contract
- Family support

The following summary shows the overall costs of the PhD:

1st Year	Application Fee € 35,00	Yearly Insurance for third parties liabilities and accident and Stamp	€ 27,69
2nd Year		Yearly Insurance for third parties liabilities and accident and Stamp	€ 27,69
3rd Year	Graduation Fee € 32,00	Yearly Insurance for third parties liabilities and accident and Stamp	€ 27,69

Tot € 149,95

Mobility Programmes

Erasmus+

Erasmus+ is the EU Programme for education, training, youth and sport. The programme seeks to enhance the quality and reinforce the European dimension of higher education by encouraging transnational cooperation between Universities, boosting mobility for students and staff, improving transparency and full academic recognition studies and qualifications throughout the EU. A total of 12 months of mobility are allowed for each cycle, bachelor's degree courses, master's degree courses, PhDs and a total of 24 months for one-cycle courses.

Erasmus+ Mobility for Study

Every year Tor Vergata University supports the mobility of about 1,200 students, 700 outbound and 500 inbound. At present, there are more than 600 Erasmus agreements between Tor Vergata University of Rome and European partner universities, offering students a wide number of mobility scholarships for each academic year. Every year University launches the Call between January and February.

Erasmus+ Mobility for Traineeship

This programme allows students to access training internships in companies, training and research centers in the programme and partner countries as activities recognised as an integral part of the students' study plan. The mobility can last between 2 and 12 months. Tor Vergata students can also apply to these Consortia: UNIPHARMA-GRADUATES; SEND and MVNGO. Two Calls are available every year: the first between February and March and the second in September.

Erasmus+ International Credit Mobility

This action supports physical and blended mobility of higher education students and staff from/ to third countries not associated to Erasmus+. Students in all study fields and cycles can take part in a study period or traineeship abroad. Higher education teaching and administrative staff can participate in professional development activities abroad, as well as staff from the field of work to teach and train students or staff of higher education institutions.

Overseas Programme – Outgoing Students

The goal of this programme is to allow students of Tor Vergata University of Rome to spend one semester at an extra-European partner university under a cooperation agreement framework for exam purposes. The grants are allocated to different areas of destinations: North America, South America, Asia and Africa. The courses attended abroad must be consistent with the student's course of study. During their stay abroad, students must be properly enrolled and up to date with payments, and they will earn their Degree only after their return to the home University.

Thesis Abroad

The goal of this grant is to support graduating students wanting to work on their thesis abroad. The call is for Master's Degree and one Cycle graduating students who have a thesis proposal approved by a University supervisor. Destinations can be all over the world (grants will be different for Europe and extra European destinations) and chosen by the student.

Mobility Confap Italy Project

The project aims at facilitating and supporting effective collaboration between the Brazilian association CONFAP and an Italian Network of Universities to further scientific, technological and innovation cooperation, through the mobility between the two countries of PhD students, Master's students (Mestrado and Laurea Magistrale students) and post docs.

Facilities for Tor Vergata community: "Agevola"

Tor Vergata University of Rome, through the "AGEVOLA" initiative, gives the students the possibility of benefitting from more than 250 partnerships, offers and discounts.

Check on www.agevola.uniroma2.it all the deals and discounts: restaurants, theatres, concerts, travels, gyms and much more.

Language

University Language Centre (CLA)

The University Language Centre (CLA) supports the teaching and learning of seven foreign languages (English, French, Spanish, German, Russian, Polish and Portuguese, and of Chinese). It caters for curricular language courses for the students enrolled at Tor Vergata University of Rome as well as for those under EU programmes (Erasmus+). Its activities are based on relevant research in second language acquisition and educational technology.

Amongst its main aims, the Language Centre promotes multilingualism by supporting and officially certifying the foreign language competences for personal, academic and professional purposes. www.cla.uniroma2.it

CLICI - Centre for Italian Language and Culture of Tor Vergata University of Rome

CLICI promotes the diffusion of Italian language and culture through cultural and educational initiatives (conferences, congresses, courses, etc.) and offers courses in Italian language and culture to both Tor Vergata students and foreigners from all over the world. CLICI organises extensive and intensive Italian language courses throughout the academic year and designs courses for international projects. The Centre is also responsible for the training of student teachers enrolled in the postgraduate specialisation course 'Insegnare Lingua e Cultura Italiana a Stranieri – LCS' and in the Master's course 'Lingua e cultura italiana a stranieri per l'accoglienza e l'internazionalizzazione – LICUS', both organized by Tor Vergata University of Rome.

Tor Vergata Shuttle Bus

Two free shuttle buses are available for students from Tor Vergata train station and from Anagnina underground station to the University buildings. Routes and timetables are available on the University website: www.uniroma2.it

Tor Vergata Placement

The Office is dedicated to connect students and graduates of Tor Vergata University of Rome with the job world. Through recruitment initiatives, students have the opportunity to establish direct contact with the companies and get acquainted with the professional world before obtaining their university degree. Tor Vergata calls Business with two Career Days: the University holds two important events for students and graduates to meet up with companies looking for talents.

Welcome Weeks

The welcome weeks are dedicated to welcome and orientation activities for all students arriving at Tor Vergata University of Rome. Our Staff welcomes all the international students in September, supporting them with stay permit and other administrative procedures necessary to study in Italy.

We also provide information about public transportation, health insurance, campus life and other useful students' services.

<https://en.uniroma2.it/admissions/welcome-office/>

IaD School

The IaD School builds methodological and technological skills through online and/or blended teaching and learning.

<http://www.scuolaiaad.it/>

Cultural, sport and leisure activities

Who we are

We are basically the University Sports Centre. The **Cus** is the local branch of the Cusi (Italian University Sports Centre), an institution recognised and approved by the Coni (Italian National Olympic Committee). For this reason, some of our activities are still in operation even now, where sports activities are suspended due to the control restrictions of the Covid19.

The Cus Tor Vergata is the youngest Cus in Italy. We were founded in 2015. Despite this, we have managed to offer numerous activities and participate in many national and international competitions. Our password is: fair play! This means much more than "obeying the rules" - it also includes the concepts of friendship, mutual respect and sportsmanship

Planning & Organisation

We offer you an extensive programme with more than 21 sports activities, both individual and in team, with very competent and serious coaches.

In addition, you will always be assisted by a knowledgeable and friendly front office staff.

Some of our sports

Football, Volleyball, Basketball, Touch Rugby, Rugby, Tennis, Padel, Archery, Nordic Walking, Fitness indoor, Salsa & Bachata, Subbuteo, Self Defence, Silat, Pole Dance.

Botanic garden

Founded in 1982 Tor Vergata's Botanic Garden offers a centre for germplasm conservation, inaugurated with three greenhouses and scientific laboratories equipped according to the most modern requirements for germplasm conservation.

In 2010 the initiative 'Adopt a tree' kicked off and became a great success thanks to a 'Citizen campaign' involving schools, university students, staff and local residents. During the first official event open to all, i.e. 'Spring at the Botanic Garden of Tor Vergata', about 2.000 people visited the gardens and adopted 400 trees. <http://en.uniroma2.it/about/botanic-garden/>

Archeologia per Roma Museum

APR Archeologia per Roma Museum: the first didactic and interactive museum on Archeology in Rome. It offers an original viewpoint on the whole of the Capital's Archaeology describing a different relationship between the City Centre and suburban areas. The programme schedules a number of didactic, cultural and leisure activities for both adults and children. Entry to the Museum is free.

Music

Roma Sinfonietta and the Association of music today organise a season of concerts at Tor Vergata University of Rome, Auditorium “Ennio Morricone” at the Macroarea of Humanities and Philosophy. Concerts expanded its range, embracing chamber music of the great composers and jazz, contemporary music theatre and traditional music of the Italian regions, the “bel canto” and tango, the music of medieval poems and meetings with today’s composers.

If you like to sing, you can become part of the Choir of Tor Vergata founded in 1997 by Agostino Ziino, Professor of History of Music at the Tor Vergata University of Rome and its Artistic Director. Professors, students and technical staff of the University take part in this project, which is officially recognised as the Ateneo Choir. Since 1999, the Choir has been permanently conducted by Maestro Stefano Cucci. If you are interested, visit the Facebook page of Choir Claudio Casini.

If you like playing music, you can book a music rehearsal space dedicated to music-making at Campus X!

Tor Vergata Sailing Club

It is an amateur sports club where to practice sea sports and sailing sports.

Services for students with disabilities or Specific Learning Difficulties (SLD): the CARIS Commission

The CARIS Commission provides services to encourage full and active participation in the academic life of students with disabilities, specific learning difficulties or temporary difficulties. CARIS offers: tutoring services and personal guidance on campus and in the classroom, loan services for textbooks and computer equipment, software and specific technological aids, sign Language interpreters or stenotypes for hearing impaired students, assistance with entry exams to degree courses, speech therapy available for students with speech impediments and learning disabilities in order to prepare students for exams, counseling services for psychological and emotional needs, total exemption of university fees for students with certified disability.

www.caris.uniroma2.it www.facebook.com/CARISuniroma2/

White Code Room

A basic health care centre is available at Tor Vergata for international students. The service is free of charge for all Italian students residing outside Lazio, for all European students who have an ENI card number and for students of any nationality enrolled in the Italian National Health Service (SSN/SSR).

Examination rooms are located in the Occupational Health Department of the University Hospital. This facility is organised on a walk-in basis, without prior appointment.

For information: whitecode@med.uniroma2.it

Sustainability & Inclusion

Sustainability and inclusion are an important part of the Ateneo's values. Committed to our students and the world, Tor Vergata University of Rome has placed the United Nations Global Development Strategy implemented in 2015 and the Sustainable Development Goals, at the centre of its own mission and institutional vision. The University takes concrete actions to make its important contribution to the challenge set by the Agenda of 2030: to promote a sustainable global development at the economic, social, environmental and institutional levels.

Some of the actions that are being implement inside the University are:

- SEDIA (Stazioni Ecosostenibili Didattico-ricreative In Ateneo): "Ecosustainable Didactic-Recreational Stations In the University" is an energy engineering project that aims to equip the outdoor spaces of the Campus with self-powered (with solar panels) convivial benches for the university community.
- Goccia (Goal One Cambiamento Climatico In Ateneo): Purified water dispensers to promote the consumption of drinking water and the use of reusable bottles to reduce the production and consumption of PET bottles.
- Onda 2030: it is a work of art inspired by the 17 Goals on the UN 2030 Agenda.
- Rapporto di Sostenibilit : annual report, it is the only university in Italy that has prepared and published this reporting document also in the value of a non-financial declaration pursuant to art. 3 c. 10 of the Legislative Decree. 254/2016.
- Agender Toilet
- "Red Bench": the symbol of the awareness campaign against gender violence was installed in Tor Vergata Rectorate

How to reach Tor Vergata University

By car

Take Exit number 19-20 from the Grande Raccordo Anulare (GRA), the highway surrounding the city Direction: Romanina – 2°Università

By train Roma Termini

Once there, take the subway Line A toward Anagnina, the last stop. Once there, take Bus number 20 or 500 (depending on your final School destination) that will take you in a few minutes to the Tor Vergata Campus.

Main public transportation

(Metro and Bus ticket cost 1,50 euro)

Metropolitana – Linea “A” (Orange) to Anagnina station

- Get off at Anagnina (last stop) and take the Bus 20 Express to reach: Central Administration Offices, School of Law, School of Economics; Engineering; Humanities and Philosophy; Mathematics, Physics and Natural Sciences; Medicine and Surgery
- Get off at Anagnina (last stop) and take the bus 500 to reach: Medicine and Surgery; Mathematics, Physics and Natural Sciences;
- Get off at Anagnina (last stop) and take the bus 506,507,509 to reach: Central Administration Offices, School of Law

Metropolitana Linea “C”

- Get off at Torre Angela and take Bus 500, 506 and 20 Express

Cotral extra-urban lines: Cotral services connect many municipalities of lower Lazio with the Anagnina underground station, crossing the university campus “Tor Vergata”.

From the airport

Fiumicino Airport Leonardo da Vinci

By car

- From the Roma – Fiumicino Highway enter into GRA, direction NAPOLI, then take Exit 19-20 (Romanina – 2°Università)

By train

- Take the Leonardo Express from Fiumicino Airport to Roma Termini (Rome main railway station). There you can catch the Metro Line A from Termini to Anagnina, getting off at the last stop, Anagnina
- Train from Fiumicino Airport Railway to Roma Tuscolana station, walk for 5 minutes to the Metro Line A stop, Ponte Lungo, take it toward Anagnina, and exit at the last stop, Anagnina

Ciampino Airport

- Take the Blue Bus ATRAL or ATAC bus to Anagnina Metro Station. From there take the Bus service (see main public transportation).
