

TEMA 1

Il candidato discuta una delle seguenti tracce:

1. Explain the concept of intrusion detection systems (IDS) and intrusion prevention systems (IPS). How do they contribute to network security?
2. Discuss the memory management mechanisms in programming languages.
3. Discuss the concept of content delivery networks (CDNs) and their role in optimizing the delivery of web content. Explain how CDNs improve performance, scalability, and reliability in distributing content to end-users globally.
